About Conference

All India Agricultural Students Association (AIASA), New Delhi, Indian Council of Agricultural Research and University of Agricultural Sciences-Bengaluru with pleasures invite all the young researchers, research scholars, policy makers, academician, and youth farmers across the globe to the International Conference on “Advances in Agriculture and Food System Towards Sustainable Development Goals” (AAFS-2022) during 22-24th August 2022. The Conference includes keynote presentations, oral talks, poster presentation and exhibitions and it will be organized in hybrid mode. Food security is often explained in terms of food availability, food access and food utilization. Agriculture plays a fundamental role in people’s ability to improve their diets, supplying food for consumption and providing income that can be used to purchase nutritious food. Improved agriculture and food systems will emphasize diversification, encompassing nutrient-dense; climate-resilient; economically viable; and locally available or adaptable species. Selecting crops that are traditionally grown by women can also create synergies with objectives to empower women. Integrated farming systems are a mix of crop production, animal and fish raising, specially adapted to local conditions that can greatly contribute to diversifying diets. Nutrition-sensitive agriculture which promotes integrated farming systems can improve the supply of a greater diversity of plant and animal-based foods and help to ensure people have year-round access to nutritious diets.

The main aim is to provide common international platform and conduct healthy interactive sessions among the youth on the topic “Advances in agriculture and food system towards sustainable development goals” with themes like sustainable transformation in agriculture and food production system, Recent Advances in Aquaculture for food and nutritional security, Innovation in Global & Regional Agricultural Education Towards Youth Empowerment, Climate Change resilient Agriculture, Post-Harvest Technology for Responsible Consumption, Global and Regional Policy Transformation. Accordingly, the targeted audience/attendees will be the students and global foodexperts/ scientists/ researchers/ academicians/agriculturists/economists/environmentalists/ industrialists and innovative farm youth/farmers.

About UAS-Bengaluru

The University of Agricultural Sciences-Bengaluru (UAS-B) was the first State Agricultural University (SAU) in Karnataka established in 1963 through an act of the Legislature of the then Mysore State. The visionary leaders of the nation realized the importance of modern science and technology and higher education as means to shore up the woefully inadequate food production in the country. In less than a decade of the establishment of UAS-B and a few other SAUs in the country, India recorded a phenomenal jump in food production and the English language acquired a new phrase - Green Revolution. It is a matter of great pride for UAS-B to have played out its role in ushering in a quantum leap in food production in the state through a slew of technological interventions in the 1970s and 80s. The unbounded enthusiasm of the faculty and scientists left no stone unturned and no crop untouched – from the traditional cereal-pulse-oilseed cropping system to viticulture, every crop got its due attention on innovations in production technology. Several other allied sectors like horticulture, sericulture, forestry, animal husbandry also witnessed transformational changes turning Karnataka into a model state for agriculture, horticulture, and dairy industry.

About AIASA

AIASA is an organization represented by professionals of present-day and ex-students of Agriculture, Veterinary Science, Dairy, Horticulture, Fisheries, Forestry, Home Science, Sericulture, ABM and other allied sectors. AIASA is a Registered Society Registered under Societies Registration Act 1860 and covered under section 12AA and 80G of Income Tax Act 1961. It is established with a mission of strengthening the voice of passionate agro-professionals, veterinarians, at State, National, and international level. AIASA empowers and motivates youth to view agriculture as an equivalent career opportunity and thereby promoting knowledge transfer & agripreneurship in the country with the help of self- driven and directed agrarian policy to the work force. AIASA holds National Youth Convention once in a year jointly with one of the agricultural universities as host Institution and ICAR. This will be First International Conference to be organized by AIASA jointly with UAS-Bengaluru and ICAR.
